

ADiNO[®] CL 4980.0

Liquid Cleaner for EVA and PO Hotmelt Adhesives

Application

- Removal of EVA or PO based hotmelt adhesive residues
- Flushing and maintenance of hotmelt adhesive melting units (for EVA or PO based adhesives)

Technical Data

Basis	: Organic Compound in Aqueous Solution
Appearance	: Liquid
Colour	: Clear Red
Density	: approx. 1.02 g/cm ³
pH value	: 12

Instruction for Use

Use ADiNO[®] CL 4980.0 in steps as follows:

- 1) Remove / drain the molten hotmelt that remains in the melting unit and turn off heating.
- 2) Wait until the melting unit has cooled down to room temperature.
- 3) Apply ADiNO[®] CL 4980.0 with a brush or alike and clean the adhesive residues from melting units etc.

Always check the compatibility of the surfaces to be cleaned before use.

Follow cleaning and maintenance instructions of the melting unit supplier.

Packaging / Storage

3 ltr bottle / shelf-life 24 months after production date.

Keep in a cool and dry place

All information based on internal tests and many years of practical experience.

The variety of materials used and different work conditions, which lie beyond our control, preclude any claims based on this data. We recommend performing sufficient test and pilot run that our technical service team gladly support.
